

Enriching the Lives of Residents Living in Memory Care  
MSWAP- October-2022  
Cathy Braxton, CEO, Owner, Creator improv4caregivers

When the focus remains on purpose and relationship driven interactions, we find ourselves more successful in enriching the lives of care partners

Let's focus and dive into the ideas:

1. Tweek what we are already doing
2. Use what we already know
3. Learn from our observations and knowledge of others
4. Share in the gifts

What do you think is the most important thing (or things) that can enrich the life on memory care?

---

---

---

When does the process of life enrichment begin... for you? For your residents?

---

---

Who are the key players in ensuring life enrichment?

---

---

---

Now lets talk process:

1. What can you tweek? Who can you enroll in assisting you?

---

---

2. If you use what you know, reflect on successes and blunders in wholistic life enrichment:

---

---

3. What have you learned from other thus far? What would you be open to learning more about? Who do you go to for inspiration?

---

---

4. Sharing of the gifts- what is this and how does it work... and work best?

---

---
